

Responsible visitor charter

At Chatsworth we acknowledge our role in addressing global sustainability challenges such as climate change, natural resource shortages and threats to biodiversity. We are grateful that our visitors share our concerns and aim to act responsibly. Please help us to look after this special place by considering the following 'green' suggestions:

Reduce - Reuse - Recycle

Help us minimise our demand on natural resources by disposing of waste in the correct bins. Please don't waste serviettes or toilet paper and ensure that recyclables are free from any leftover food.

Carbon footprint

Our visitors' biggest environmental impact is the carbon footprint associated with travelling here. Perhaps you could share a lift, leave the car at home and catch a bus or train, or consider walking or cycling?

Conserve water

Much of the water we use is sourced from the estate – help us to conserve this precious resource by ensuring taps are turned off after use.

Respect nature

We are incredibly lucky to be surrounded by spectacular biodiversity. Please help us protect our landscape and its wildlife by keeping dogs on a lead and putting litter in the bins provided.

Buy local

We aim to support our communities by sourcing products locally. There are countless fantastic producers in the Peak District – ask us for advice on where to look.

Support green businesses

Chatsworth is a proud holder of the Green Tourism Business Scheme Gold Award. Support sustainable businesses - look out for the Green Tourism logo

If you have any questions or suggestions relating to sustainability, we'd love to hear from you. Please speak to a member of staff or email sustainability@devonshiregroup.co.uk
