

How does your garden grow?

Make your own mini greenhouse and see whose grows the best!

You will need:

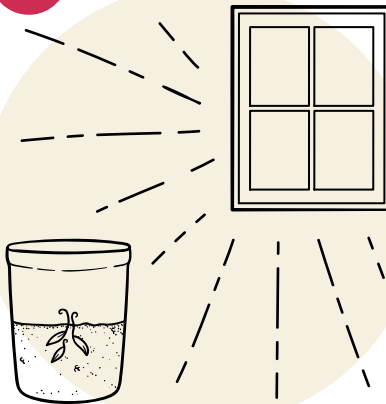

- Washed yoghurt pots
- Compost
- Seeds
- Pen and paper

1

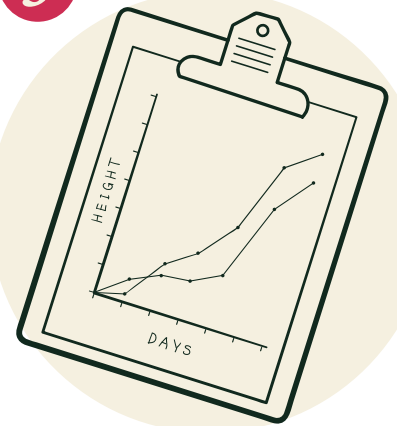

Using yoghurt pots, ask a grown-up to help you make small holes in the bottom of the pot. Fill the pot with soil and plant seeds in the soil.

2

Once planted up, place them in different locations where the intensity and amount of sunshine varies.

3

Plot the growth of plants over time and record your findings in graph format. Whose mini greenhouse is the most effective?

Try using different 'greenhouse' designs:

- A shallow tray covered with a recycled plastic bag
- A shallow tray with a recycled plastic bag raised tent-like on sticks
- Jam jars of different heights and sizes.
